THE POSITION
The City is seeking an Assistant Engineer to perform and assist varied civil engineering work in the design, review, construction, and inspection of a variety of municipal and development projects, and to act as a general assistant to senior level departmental staff. The ideal candidate is committed to public service and excels in and fosters a team environment.

EXAMPLES OF DUTIES
Under direction of the Public Works Director or designee, duties may include, but are not limited to, the following:

• Coordinate the development of plans, specifications, and estimates (PS&E) for construction and major repair of public works systems.
• Confer with supervisors and staff regarding project priorities and major repair of public works systems.
• Check subdivision plans for conformance to City standards.
• Administer construction contracts by coordinating with consulting engineers'; inspect project sites to assist in solution of difficult problems; and interpret specifications.
• Participate in the preparation of special engineering studies and reports.
• Coordinate public works systems activities with other City departments, divisions, and sections and with outside agencies.
• Assist in the preparation of the division's budget.
• Review and check tentative and final land division and subdivision improvement plans and agreements for accuracy and conformance with City codes, ordinances and policies.
• Participate in the development of Conditions of Approval for private development projects.
• Assist in the preparation of the Capital Improvement Program (CIP).
• Attend City Council meetings and represent division as required.
• Attend engineering meetings and conferences to keep abreast of current municipal engineering techniques.
• Perform related duties as assigned.

QUALIFICATIONS
Knowledge of:

• Principles and practices of engineering as applied to public works and construction projects.
• Methods and techniques used in the design and construction of a variety of public works projects.
• Modern developments, current literature and sources of information regarding the assigned area of engineering.
• Applicable federal and state laws and regulations.
• Applicable laws and regulatory codes related to development and construction.

Ability to:
• Plan, direct and coordinate public works engineering projects.
• Communicate clearly and concisely, orally and in writing as an agent of the City with residents, business partners, and elected officials.
• Prepare specifications, cost estimates, work schedules, plans, maps and reports.
• Make complex engineering computations and check, design, and inspect the construction of a wide variety of public and private facilities.

EXPERIENCE AND EDUCATION
Any combination of experience and training that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

Experience:    Two years of experience in the performance of engineering work.

Education:    Equivalent to a Bachelor's degree from an accredited college or university with major course work in engineering.

LICENSE OR CERTIFICATE
Possession of, or ability to obtain, an appropriate California driver's license, and a satisfactory driving record.
